

8-14-03 I have been a ham since 1964 (KZ5JX & WA8SIE) I hope and pray that the purposed action of using BPL communications be squelched entirely. This will affect millions of "Ham Operators" now using the HF spectrum, and who knows what else. We now have enough problems with the very high tension power lines causing HF and TV interference. There is not a real need to increase this problem. Thanks. //... Joe A. Redd
